EDUCATION

University of California Irvine

2017 **B.S. Computer Science** awarded with a specialization in Architecture and Embedded Systems
2011 **B.A. Japanese Language and Literature**

WORK EXPERIENCE

2017 · Present **Freelance Developer · Freelance QA Tester**

- Designed and implemented Shopify/Squarespace UI/UX to better showcase clients' products.
- Ensured game titles complied with Sony's TRC and Microsoft's TCR certification standards.

2012 · 2016 **QA Project Lead** at **DIGITAL Hearts USA Inc.**

- Tested dozens of successfully shipped titles from clients such as Namco, Square-Enix, Capcom, Atlus, etc.
- Coordinated multiple teams of testers and trained senior testers to become successful project leads.
- Developed and maintained reusable test plans and documentation to efficiently meet clients' requirements.

2013 · 2014 **Mobile QA Tester** at **Nexon M Inc.**

- Provided essential feedback early in development, leading to significant improvements to overall gameplay.
- Assisted in the creation of test plans to be used on all future Nexon M game titles.

PROFICIENT LANGUAGES

Proficient C · C++

NON-TECHNICAL SKILLS

Languages English · Chinese (Teochew) · Japanese

FAMILIAR LANGUAGES

Coding Java · VHDL
Scripting Python · Ruby · JavaScript
Markup HTML · CSS · LaTeX
Shader GLSL

TECHNICAL SKILLS

Frameworks Cocoa · Win32 · Xlib · OpenGL
Microcontrollers AVR · ESP8266 · MSP430
Tools JIRA · Git · GCC · LLVM · Valgrind

PROJECTS

OpenGL windowing library Manages the creation/destruction of OpenGL Windows on macOS, Windows and Linux.
SSD1531 graphics library Supports tile-based sprites and scrolling backgrounds using an ESP8266.
Predefined C macro library Identifies architectures, compilers, platforms and standards at compile time.
IFF/ILBM parser library Supports parsing/reading/writing/compression/decompression of IFF/ILBM chunks.
WS8211 LED rave totem Controls WS8211 LED strips with an ATtiny85 to display various animations.
Obstacle avoidance robot Arduino-based 4-wheeled robot utilizing an HC-SR04 sensor to avoid obstacles.
MIPS processor in VHDL Implementation of a processor that can execute a subset of MIPS ISA.
